

# Qualys Certificate View v2.x

## API Release Notes

Version 2.6

May 5, 2020

Qualys Certificate View API gives you many ways to integrate your programs and API calls with Qualys capabilities.

### **What's New**

[Support to get Last Found Date for a Certificate](#)

### **Qualys API URL**

The Qualys API URL you should use for API requests depends on the Qualys platform where your account is located.

[Click here to identify your Qualys platform and get the API URL](#)

This documentation uses the API server URL for Qualys US Platform 1 (<https://qualysapi.qualys.com>) in sample API requests. If you're on another platform, please replace this URL with the appropriate server URL for your account.

## Support to get Last Found Date for a Certificate

---

APIs affected	/certview/v1/getEndpointData
---------------	------------------------------

---

New or Updated APIs	Updated
---------------------	---------

---

You can now view the last found date of a certificate using the new output parameter lastFound in this API.

### Sample

#### API request:

```
curl -X POST
"https://gateway.qgl.apps.qualys.com/certview/v1/getEndpointData"
-H "Accept: application/json" -H "Content-Type: application/json"
-d "{ \"ip\": \"64.41.200.100\", \"port\": 443, \"fqdn\": \"\",
  \"service\": \"tcp\"}" -H "Authorization: Bearer <JWT Token>"
```

#### Response:

```
[
  {
    "ipAddress": "64.41.200.100",
